Caring for your Knitwear

We take care creating iconic knitwear so that you can enjoy luxurious knits that last for many seasons.

We generally recommend laundering your knits every three or four wears. Always turn knits inside out when washing and avoid excessive use of fabric softeners. Always use a mild detergent.

You will find washing instructions for each product on the care label sewn inside your knitwear.

If pilling or small balls of fibre occur remove gently by hand with a pilling comb and always work in one direction.

We recommend removing jewellery and accessories that may catch on the knit when wearing.

When storing knits at the end of the season, make sure they are freshly washed before being stored. Knits should be folded and stored flat in drawers or on a shelf.

With Love,
